Methodology

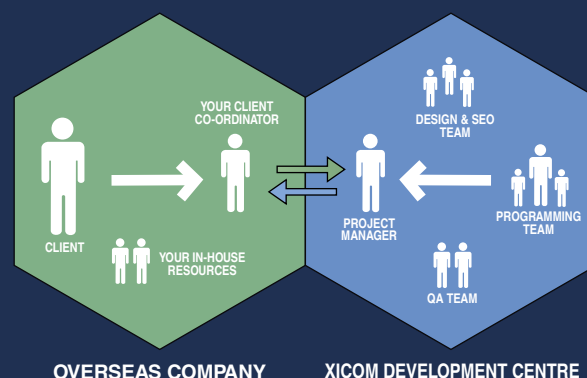

Xicom's development methodology provides a structured framework aimed at delivering high quality software solutions to our clients. Over last 10+ years we have refined our business process by blending the best industry practices like Rational Unified Process (RUP) and Agile Methodology and absorbed the best approach to get maximum performance and highest quality for projects while reducing redundant complexity that may effect project budget or timing.

RATIONAL UNIFIED PROCESS MODEL (RUP)

(for complex projects)

AGILE METHODOLOGY

(for small-mid sized projects)

Expertise

As an IT technology consulting company, Xicom proactively gain insights into leading and emerging technologies to meet the ever-growing needs of clients.

PHP/LAMP

Xicom has a rich experience in delivering high quality PHP web applications for enterprises in various domains. Our expertise is spread across robust PHP frameworks including CakePHP, Zend, CodeIgniter, Symfony, Yii etc. and open-source cms systems such as Drupal, Wordpress and Joomla.

We leverage the time and cost saving advantages of open source technologies to deliver cost-effective and information enriched portals to full-blown scalable web solutions through engagement models most suited for your requirements.

ASP.NET

Xicom has been using the Microsoft .NET Framework from its first release in 2002 to deliver robust and scalable web, enterprise and desktop applications. Our skills include ASP.NET (MVC3), ASP.NET 3.5/4.0, Windows Forms, .NET Remoting/Web Services, Silverlight, Sharepoint, ADO.NET.

Our services are available for customized application development, integration of web based application with legacy systems and mobile application development.

Java/J2EE

Xicom provides robust software solutions using the power and flexibility of the modular approach offered by the J2EE platform. Our Java consulting and software development services provide full support at every stage of project development from architecture to implementation.

We provide services that can utilize efficiently the services available from Java application servers and the J2EE framework, including Struts, Servlets and Java Server Pages (JSPs), Enterprise JavaBeans (EJBs), Java's Messaging Services and JDBC.

Mobile Solutions

Xicom offers advanced services in the field of mobile application development across various platforms including iPhone/iPad, Android, J2ME, Blackberry and Windows Mobile.

We are constantly engaged in raising the bar and setting higher standards for mobile applications by using the three key characteristics, i.e. anytime access, personalization and contextual use, offered by mobile platforms. Xicom has been assisting large enterprises in making critical business decisions through its innovative mobility solutions since last 10+ years. We utilize the most effective technologies for building the perfect mobility solution for your business.

BY OUTSOURCING YOUR IT
REQUIREMENTS TO XICOM

Engagement

Xicom engages its clients in various flexible ways using our refined engagement models to manage client requirements that could be one time or ongoing multi-year projects.

Xicom is in the market for offshore outsourcing services since 2002, enjoying high customer retention rates and building lasting relationships with first-tier companies. Xicom is an attentive partner, flexible in tuning the established engagement models and helping each client make the most out of the partnership. Our engagement management practices are built in accordance with the eSourcing Capability Model for Service Providers (eSCM SP).

Xicom engagement specialists customize the engagement model to work around the client enterprise specifics - from business goals to project management and HR practices. Xicom offers different engagement models to meet global clients' diverse needs

Fixed Time/Fixed Cost Project Model

Xicom offers customers a fixed time / fixed price model when the scope and specifications of the project are reasonably clear. Under this low-risk model we work with clients to define expected deliverables and timelines to determine a mutually agreed fixed price. Our refined process guarantees reliability, predictability and optimized performance of the projects and assures on-time and on-budget outcomes.

Dedicated Teams Model (DTM)

Dedicated Teams Model (DTM) is an excellent solution if you need a complete control over human and technical resources involved into the development process. DTM features a high level of transparency, security, flexibility and scalability. All infrastructure and personnel are at your dedicated service as long as you need them for a fixed monthly fee.

DTM is a good choice if you need a team of highly-qualified professionals that will exactly match your IT and business needs. This makes the development process more explicit and manageable and ensures a higher resources efficiency. Dedicated teams operates as an extension of the customer's development center. In this model, Xicom forms project teams with the required team members, project managers, equipment and infrastructure based on client requirements.

Benefits of our Dedicated Teams Model (DTM)

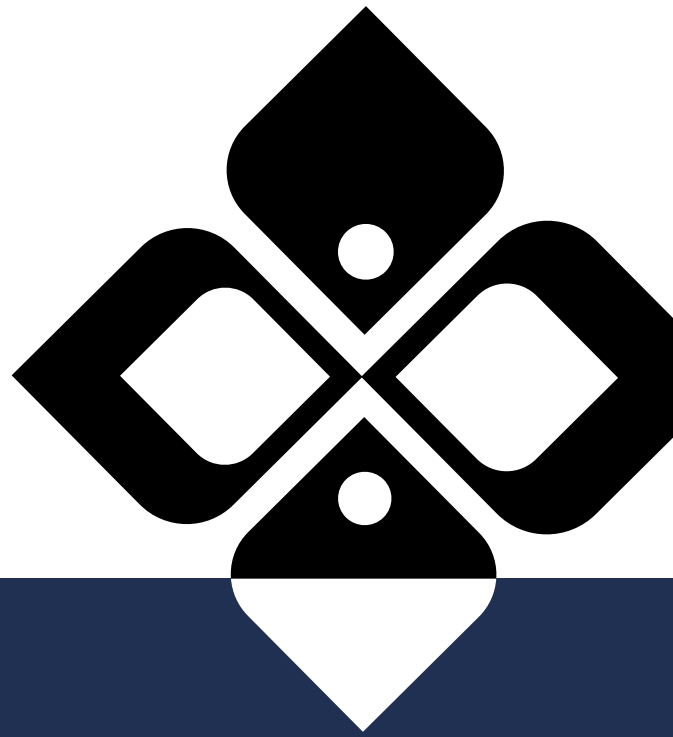

Xicom has a vast pool of multi-disciplinary resources to organize a tailored DTM engagement for any type Of software or mobile application project requirements. Our dedicated teams model (DTM) offers clients' an easy & cost effective solution for engaging different kinds of technical groups & resources.

- Access to a wide-range of expert IT resources with diverse skills across all platforms.
- Ready to use IT infrastructure with best facilities that includes staging server, project management system, SVN and network support.
- Complete control over team structure (addition/replacement/withdrawal of resources)
- Transparent billing process and comprehensive reporting procedures.
- Complete control over your project flow including schedules/deliverables etc. Your project gets developed in an 'Agile Environment' which means you see your project being developed in real-time.
- Established intellectual property protection procedures and processes.
