WWW.XICOM.BIZ

CORPORATE

Xicom is an ISO 9001:2008 certified software development enterprise with a strong team of 300+ highly skilled IT experts, catering result-oriented and cost-competitive solutions to SMEs across the world.

Combining our solid business domain experience, technical expertise, profound knowledge of latest industry trends and quality-driven delivery model, we deliver solutions that go beyond meeting customer expectations.

WHO WE ARE?

Xicom is an established, global IT software enterprise delivering web development, mobile app development, software development and IT consulting services of any complexity to clients worldwide. Being in IT business for over 20+ years, Xicom has a strong team of 300+ highly skilled IT professionals.

As a premiere member of NASSCOM, STPI and Upwork and recognitions from leading business standardization organizations, Xicom carries trust of more than 1500+ clients spread across diverse business verticals.

OUR STRENGTHS

- One-stop IT services provider for web, mobile, application and consulting services.
- Thorough understanding of business models and latest technology trends.
- Dedicated, competent and technologically enriched team of 300+ experts.
- Commitment to quality as per ISO 9001:2008 standards.

WHAT WE DO?

Xicom provides comprehensive and integrated IT services that includes strategic consulting, software development, mobile application development as well as the development and implementation of world-class e-business applications. Our expertise guarantees quality, competence and rapid execution of any projects ranging from mid-sized portals to complex software development and custom mobility solutions.

We use a low-risk Delivery Model to accelerate schedules with a high degree of time and cost predictability. This lets us establish a clear set of goals that ensure the quality of work is maintained throughout the entire development process for 100% client satisfaction.

OUR PHILOSOPHY

Our belief in customer's success as our success has propelled our growth and helped us build an affable relationship with our clientele spread across the globe. We are committed to delivering maximum value to our clients helping them succeed in a constantly changing and challenging business world.

Our fundamental company values stem from the understanding that our success is directly tied with the success of our clients.

OUTSOURCING

Xicom offers a full range of IT outsourcing services from end-to-end development of new software, web and mobile applications to re-engineering and enhancement of existing legacy applications.

It is a challenge to keep track of emerging technology and deploy it effectively to fuel your growth. Outsourcing helps you manage this challenge. Xicom is an ideal partner who can help you meet this ever-growing challenge of integrating technology with your business needs.

BENEFITS OF OUTSOURCING TO XICOM

ACCESS TO EXPERTISE - Xicom has accumulated considerable expertise in different technologies and business domains. Our experience ranges from simple web applications to development and integration of complex enterprise systems and mobile apps.

HIGH SKILLED TEAM - Xicom has a team of 300+ IT specialists with wide knowledge and extensive experience. Our effective hiring strategy, internal trainings, links with leading technical universities and proper motivation practices enables us to hire and retain the best-of-breed IT professionals.

SECURITY OF INTELLECTUAL PROPERTY - At Xicom we take comprehensive measures to secure the clients' confidential information. We have a set of policies and procedures to protect your business sensitive information and software artifacts (source codes, specification, etc.). After the project is finished, you retain the source codes and all IP rights on developed software.

SEAMLESS COMMUNICATION - Xicom realizes the vital importance of effective communication for outsourcing projects. We aim to create and maintain a productive and secure communication flow.

BY OUTSOURCING YOUR IT
REQUIREMENTS TO XICOM

ENGAGEMENT

Xicom engages its clients in various flexible ways using our refined engagement models to manage client requirements that could be one time or ongoing multi-year projects.

Xicom is in the market for offshore outsourcing services since 2002, enjoying high customer retention rates and building lasting relationships with first-tier companies. Xicom is an attentive partner, flexible in tuning the established engagement models and helping each client make the most out of the partnership. Our engagement management practices are built in accordance with the eSourcing Capability Model for Service Providers (eSCM SP).

Xicom engagement specialists customize the engagement model to work around the client enterprise specifics - from business goals to project management and HR practices. Xicom offers different engagement models to meet global clients' diverse needs.

FIXED COST MODEL

Xicom offers customers a fixed time / fixed price model when the scope and specifications of the project are reasonably clear. Under this low-risk model we work with clients to define expected deliverables and timelines to determine a mutually agreed fixed price. Our refined process guarantees reliability, predictability and optimized performance of the projects and assures on-time and on-budget outcomes.

DEDICATED TEAMS MODEL

Dedicated Teams Model (DTM) is an excellent solution if you need a complete control over human and technical resources involved into the development process. DTM features a high level of transparency, security, flexibility and scalability. All infrastructure and personnel are at your dedicated service as long as you need them for a fixed monthly fee.

DTM is a good choice if you need a team of highly-qualified professionals that will exactly match your IT and business needs. This makes the development process more explicit and manageable and ensures a higher resources efficiency. Dedicated teams operates as an extension of the customer's development center. In this model, Xicom forms project teams with the required team members, project managers, equipment and infrastructure based on client requirements.

BENEFITS OF DEDICATED TEAMS MODEL / DTM

Xicom has a vast pool of multi-disciplinary resources to organize a tailored DTM engagement for any type of software or mobile application project requirements. Our dedicated teams model (DTM) offers clients' an easy & cost effective solution for engaging different kinds of technical groups & resources.

- Access to a wide-range of expert IT resources with diverse skills across all platforms.
- Ready to use IT infrastructure with best facilities that includes staging server, project management system, SVN, GIT and network support.
- Complete control over team structure (addition/replacement/withdrawal of resources)
- Transparent billing process and comprehensive reporting procedures.
- Complete control over your project flow including schedules/deliverables etc. Your project gets developed in an 'Agile Environment' which means you see your project being developed in real-time.
- Established intellectual property protection procedures and processes.

QUALITY ASSURANCE

Xicom has always taken an uncompromising position in respect to quality. Xicom's Quality Management System (QMS) is a complex set of engineering and managerial activities that ensures the delivery of high quality software through the entire workflow. The experiences from the project are ploughed back to refine the process. Continuous improvements help us meet milestones with no compromise on quality.

Our primary responsibility is to deliver maximum value to our customers worldwide. In pursuance of this effort, with our dedicated teamwork, we commit ourselves to take the leadership both in development and technology of business solutions. To adhere in letter and spirit to the technical requirements and laid down systems which is essential for our products to be consistently the first choice of our customers through inbuilt quality and on-schedule delivery.

QMS TASKS & OBJECTIVES

- Elaboration and implementation of procedures and regulations for software development process based on the industry best practices and standards.
- Product life-cycle monitoring to ensure compliance with established processes and guidelines.
- Product quality verification and validation to ensure its correspondence with the client needs and expectations.
- Establishment of an effective collaboration for all production participants

STRUCTURED QA DEPARTMENT

Xicom's QA department is an independent structural subdivision. The QA team consists of skilled QA engineers and experienced testers dedicated to a project or assigned based on client requirements. The allocation of QA engineers based on their experience levels depends upon the project size and complexity.

KEY PROCESSES

- Full-cycle QA Testing
- Document and Code Reviews
- Defect Tracking
- Configuration Management
- Process Monitoring
- Risk Management

QA SERVICES

- Functional and Regression Testing
- GUI and Usability Testing
- Accessibility Testing
- Compatibility Testing
- Performance Testing
- Installation/Configuration Testing
- System/Integration Testing
- Security Testing
- Localization Testing
- User Acceptance Testing (UAT)
